

This worksheet provides one method you can use to brainstorm a list of keywords related to your topic.

- First, enter your topic or research question, such as "west Nile virus" or "How does violence in the media affect children?" in the center box. Next, brainstorm all aspects related to your topic: Who is affected by/involved with this topic, When and Where did it occur, How did it come about, etc.
- When you have a good solid list of keywords to choose from, your next step is to begin searching in the Library Databases or Catalog. Ask a library at the Information Desk if you need assistance!
